

Research It: Prokaryotic & Eukaryotic Cells

In partners (person must be at your table) or individually, you are to research the 2 types of cells (prokaryotic and eukaryotic) and create your own notes for this topic.

Types of Notes:

- Your own.... do you have your own style that works?
- Graphic Organizer: you can use the compare and contrast one provided; however don't forget to answer the sections highlighted below.

Items to research: You can use any available resources (textbook (172 & 173), netbooks, personal device, etc...)

- > structures of each cell (including a diagram)
- > similarities between the types of cells
- > differences between the types of cells
- > Examples of each type of cell

Expectation:

- You are to pass in these notes as a practice "mark" for this topic!
