

# Notes & Outcome Practice: Origins of Evolutionary Thought

## Outcome 13

Name:

Biology 12

**Directions:** Using textbook pages 373 to 377 as well as the tutorial provided, complete the following chart and questions looking at the scientists that contributed to Darwin's ideas of evolution.

Scientist's Name	What they did to contribute to science	How their contributions developed Darwin's thoughts of evolution by natural selection.
James Hutton (1785)		
Thomas Malthus (1798)		
Charles Lyell (1833)		

Explain why humans did not fit into Malthus's ideas of population and state what factors he found limited population growth.
